PrinterOn PrintConnect 3.0 (Build 1.1AL) Release Notes

The PrinterOn PrintConnect™ is a ready-to-go, compact network device that turns nearly any printer into a PrinterOn-enabled printer.

The following enhancements have been made in this version of the PrintConnect software

- Added new configuration options for the PrintConnect allowing the administrator to control whether to display the IP address and/or the MAC address of the PrintConnect on the PrintValet™ keypad
- Added the ability to disable or enable the SSH server running on the PrintConnect
- Improved the management of passwords for the PrintConnect device allowing for more flexible configuration of passwords from the PrintConnect's administrator web pages
- Improved the ConfigAuth management tool to provide greater control over proxy configuration settings
- Improved support for proxy network configurations
- Enhanced startup and shutdown procedures to improve the reliability during unexpected hardware shutdowns

Please contact support@printeron.com if you have any questions.
