

PrinterOn Mobile for Android Release Notes

3.0.3

Product Changes and Enhancements

PrinterOn Mobile for Android offers an integrated solution for accessing both PrinterOn's global network of Public Print locations and the PrinterOn Enterprise Platform in a single unified application. PrinterOn Mobile for Android simplifies the process of discovering and printing to all PrinterOn's services.

PrinterOn Enterprise New Additions

- **Fixed – User Input Dialog Loop**
Addressed an issue that cause a user interface loop prompting for information if the printer release codes are optional and not set to automatically generate.
- **Improved – Device Compatibility**
Addressed an issue caused by the Google Play store indicating some devices without reverse side cameras are not compatible, when in fact they are.
- **Improved – Danish Localization**
Addressed a small number of minor Danish localizations.
- **Fixed – Printing from Google Keep using Share**
Addressed an issue that caused a crash when sharing documents for printing from Google Keep.
- **Improved – User Interface Improvements**
Numerous minor user interface improvements.
