

PrinterOn Cloud Print Platform December 2012 (6001-43AS) Upgrade Notice

Product Changes and Enhancements

The PrinterOn Cloud Print Platform provides a wide range of services to customers and partners. Services include PrinterOn's Cloud Print Servers that offer print services for mobile apps, email and through PrinterOn's customizable Web Print Portal. PrinterOn Web Services also offer PrinterOn's web-based service administration portals and PrinterOn's APIs.

This upgrade has introduced greater compatibility with Equitrac's print management software suite across all PrinterOn products. The upgrade also builds upon PrinterOn's recent and significant infrastructure upgrade providing improved user and administrative tools, improved reliability and compatibility.

- **New – Chinese Provinces and Regions.**
Added support under PrinterOn's Global Directory for individual provinces and regions within China similar to the organization in the United States and Canada.
- **NEW – Driver Support Notice.**
PrinterOn Administrators will be informed whether a given printer model is supported for 32-bit, 64-bit or both to simplify configuration prior to deployment.
- **Improved – Nuance Equitrac Print Management Support**
Improved compatibility when integrating with Nuance Equitrac Print Management software.
- **Improved – PrinterOn Administrative Portal Improvements.**
Numerous improvements and fixes have been made to PrinterOn's Administrative Portal including improved support for PrinterOn's ACL management, service navigation and other improvements simplifying the administrative portal.
- **Improved – Print Job Owner Management**
Significant improvements have been made to how the PrinterOn Cloud Print platform delivers job owner information with print jobs. Enhancements allow for configuration flexibility and deployment with common Equitrac print management configurations. These improvements provide extended compatibility with a wide range of 3rd party integrations.
- **Improved – International Language Support**
Improvements have been made to better handle documents uploaded with multi-byte characters such as Japanese, Chinese, Cyrillic and more. Enhancements ensure document name information is preserved throughout the entire print workflow. Improved print job email confirmation messages to support accented characters in document names.

- **Fixed – DomainKeys Identified Mail (DKIM) Support (Thanks Bruce!)**
Addressed an issue in which an email message signed with a DKIM signature was incorrectly handled and resulted in an error reported to the user.
- **Fixed – Case Insensitive Print Portal URLs.**
Addressed an issue in which some Print Portal URLs were not case insensitive.
- Numerous other improvements to PrinterOn's Cloud Print platform
