

PrinterOn Hosted Feb2017-1 Release Notes

PTS5051-WEB6045

Product Changes and Service Enhancements

The PrinterOn Hosted Cloud Print Services provide a wide range of services to customers and partners. Services include PrinterOn Hosted Cloud Print, which offers print services for mobile apps, email and through PrinterOn's customizable Web Print Portal. The PrinterOn Web Services also offer PrinterOn's web-based service administration portals and PrinterOn's APIs.

Product Updates:

- **New – Ordered Print Management Tools**

New tools have been added to support administrators who wish to enable guaranteed print ordering for Remote Print. Tools include:

- Visibility to jobs in the managed Ordered Print Queue
- Ability to release and delete jobs from the Ordered Print Queue

- **Improved – PrinterOn Enterprise Hybrid Synchronization (WEB-6679)**

Significant improvements in PrinterOn Enterprise Synchronization have been completed allowing for efficient synchronization between services. Improvements now allow PrinterOn to synchronize 15K+ printers in 5 minutes.

- **Improved – PrinterOn Embedded for Samsung Printer Support**

Numerous improvements have been added in support of the PrinterOn Embedded software for Samsung printers, including:

- Support for PrinterOn's Secure Release Anywhere
- Support for Host device identification (WEB-6794)
- Support for configuring an API Token for embedded agent authentication (WEB-6755)

- **Improved – Delete Printer Performance (WEB-6670)**

Significant performance improvements have been introduced when managing PrinterOn sites with large numbers of printers. Deleting printers from sites with 10K+ printers is now faster.

- **Improved – Store different values for 'Print Driver' and 'Printer Description Manufacturer' (WEB-6759)**

Administrator are now able to specify different values for 'Print Driver' and 'Printer Description Manufacturer' fields for more flexibility and control.

- **Improved – Web Administration Improvements**

Multiple usability improvements have been added to the PrinterOn Hosted Administration portal, including:

- Included a "modify" link for Service URL to provide a shortcut to the configuration page (WEB-6652)

- Included “modify” links for user input information and release code details as a shortcut to the edit options (WEB-6651)
 - Includes additional information regarding the purpose of the Full Brand Name and Full Location Name (WEB-6750)
 - Included an informational tooltip for the External ID field (WEB-6748)
-
- **Fixed – “How do I print...” Link missing on some PrinterOn sites (WEB-6760)**
Addressed an issue that cause the “How do I print” instructional link to be missing in some cases. This issue was caused when the default selected printer on the site was set as offline.
 - **Fixed – Adding multiple Brother printers (WEB-6767)**
Addressed an issue that failed to allow an administrator to add more than 2 Brother Cloud BSI managed printers.
 - **Fixed – Incorrectly names Samsung SecuThru Pro Integration (WEB-6757)**
Addressed a misspelling of the Samsung SecuThru Pro 3rd party integration.

Please contact support@printeron.com if you have any questions.
