

## PrinterOn Mobile 3.3.2 and Android Print Service 1.1 Release Notes

---

iOS and Android Version 3.3.2 & Print Service 1.1

### Product Changes and Enhancements

PrinterOn Mobile offers an integrated solution for accessing both the PrinterOn Server Platform as well as PrinterOn's global network of Public Print locations in a single unified application. PrinterOn Mobile simplifies the process of discovering and printing to all PrinterOn's services.

*NOTE: After installing the PrinterOn Print Service Plugin, it is important to turn on the plugin. This is done on many devices by going to Settings->Printing->PrinterOn Print Service under the General Settings section and toggling the setting to "On".*

*For Samsung devices, navigate to Settings -> NFC and sharing -> Printing -> PrinterOn Print Service*

PrinterOn Mobile for iOS supports iOS 7 or newer.  
PrinterOn Mobile for Android supports Android 4 or newer.  
PrinterOn Android Print Service supports Android 4.4 or newer.

The following are some of the enhancements and improvements that have been made in this version of PrinterOn Mobile and PrinterOn Android Print Service.

### Product Updates:

- **New – Android Print Service Support for PrinterOn Secure Release Anywhere**  
PrinterOn Android Print fully supports PrinterOn's Secure Release Anywhere pull print workflow. Users can locate, save and print to Secure Release Anywhere pools of printers. Using the Print Service, users can both print to a Secure Release Anywhere pool and locate all associated release stations.
  - Users may also easily view all release locations in list or map format.
  - Users can release print jobs directly from their mobile phone to any printer in the Secure Release Anywhere Pool.
  - Using the QR code scanner, users can quickly add Secure Release Anywhere Pools, or identify release stations.
- **New – Mobile App Release for all Workflows**  
Improved support for releasing print jobs using the PrinterOn Mobile Apps along with Secure Release Anywhere. Updates include support for releasing print jobs from the PrinterOn Mobile App when submitted from alternate workflows, including Web Print or Email Print.
- **Improved – Enhanced MDM Service Restriction Control**  
A number of additional service restrictions have been added to the PrinterOn MDM integrations to provide administrators greater control to lock application use. These enhancements include:
  - Ability to delete all unapproved Services.
  - Automatically disable access to PrinterOn Hosted.
  - Trying to print to a printer inside the app that is not a member of the restricted service will display an error.
  - Existing printers added prior to enforcing the restrictions will no longer be able to update.

- **Improved – Good Dynamics Support and Secure Release Anywhere**  
Updated PrinterOn Mobile for Good Dynamics to support Secure Release Anywhere. The Good Dynamics SDK has also been updated to the latest release from Good Dynamics.
- **Improved – AirWatch Support and Secure Release Anywhere**  
Updated PrinterOn Mobile for AirWatch to support Secure Release Anywhere. The AirWatch SDK has also been updated to the latest release from AirWatch.
- **Improved – MobileIron Support and Secure Release Anywhere**  
Updated PrinterOn Mobile for MobileIron to support Secure Release Anywhere. The MobileIron SDK has also been updated to the latest release from MobileIron.

## System Requirements

---

### System Requirements

- iOS 7 or newer
- PrinterOn Mobile for Android supports Android 4 or newer.
- MDM integrated applications require a configured MDM server and provisioned device to work correctly.
