

PrinterOn PrintConnect 1.1AV Release Notes

Version 1.1AV

Product Changes and Enhancements

The PrinterOn PrintConnect™ is a ready-to-go, compact network device that turns nearly any printer into a PrinterOn-enabled printer.

The following update has been made in this version of the PrinterOn PrintConnect. This update is limited to addressing a single security issue.

Platform Support:

- **New – Add Support for SHA-256 SSL Certificates**

In preparation for changes being introduced to SSL certificates being issued and support requirements for modern web servers and browsers, PrintConnect has been updated to support communication with web services using SHA-256 certificates.

This update will coincide and provide compatibility with an update of the PrinterOn Hosted web services to update the certificates used to also support SHA-256.
