

PrinterOn PrintWhere 4.7 Universal Print Driver Release Notes

PrintWhere 4.7AM

Product Changes and Enhancements

PrinterOn's PrintWhere® Universal Driver is a unique and powerful software solution that enables any Windows based PC or laptop to print to any PrinterOn enabled Public, Education or Enterprise print device. PrintWhere eliminates tedious printer configuration and empowers users to discover and print to printers anywhere in the world using a simple and easy to use software solution.

This release of PrinterOn's PrintWhere Universal Driver contains numerous improvements. This release builds upon the existing PrintWhere functionality providing additional refinements and many improvements.

The following are some of the enhancements and improvements that have been made in this version of the PrinterOn PrintWhere Universal Driver.

PrinterOn PrintWhere Enhancements

- **New – PrinterOn Enterprise Local Driver Management and Support**
PrinterOn Enterprise administrators may now manually configure the Enterprise server to use locally installed drivers in addition to the PrinterOn managed drivers. This new feature will allow administrators to configure individual print queues to use any print driver, independent of whether PrinterOn directly supports the driver.
- **Improved – Citrix Print Support**
Addressed a number of issues regarding Citrix printing using the PrintWhere driver including interaction with system services and multi-session management.
- **Improved – User Interface Improvements**
A number of user interface improvements have been made to the PrintWhere configuration interface including:
 - Missing logo on Details page
 - Tree view display fixes when selecting branches
 - Spelling mistake in duplex options selection
 - Missing labels when loading PrintWhere's user interface in some applications
- **Improved – General Print Quality**
A number of significant improvements have been made to PrintWhere to improve overall compatibility with various print drivers and document formats. Changes and improvements address issues such as reporting that not printable content was produced.

- **Fixed – Korean and Japanese Document Support**

Numerous improvements were made to support printing of Far East documents including Japanese, Korean and other languages and fonts.

- **Fixed – Acrobat Reader Support**

Numerous improvements supporting printing from Adobe Acrobat XI.
