

NOTICE OF TECHNOLOGY UPGRADE

Effective July, 2011

PrinterOn Print Delivery Station (PDS) 2.6CM

The PrinterOn Print Delivery Station is a software based solution that can be used to turn nearly any printer into a PrinterOn-enabled printer.

The following enhancements have been made in this version of the Print Delivery Station software.

- Improved localization support in Web Release Interface. Updated translations for Spanish, French, Italian, German and Dutch.
- Updated the Web Release Interface to display document names in job list.
- Updated the user interface to display proxy configuration options prior to downloading and importing the software customization data.
- Improved upgrade process.

Please contact support@printeron.com if you have any questions.
