

## PrinterOn Mobile for Android 3.5.8 - Release Notes

---

Version 3.5.8

PrinterOn Mobile for Android offers an integrated solution for accessing both the PrinterOn Server Platform as well as PrinterOn's global network of Public Print locations in a single unified application. PrinterOn Mobile for Android simplifies the process of discovering and printing to all PrinterOn's services.

PrinterOn Mobile for Android supports Android 4.4 or newer.

### Product Changes and Enhancements:

- **New – Citrix MDM Support** (AND-1151)  
PrinterOn Mobile for Android now supports the Citrix MDM platform.
- **New – Multiple PrinterOn Services in an MDM configuration** (AND-1016)  
To support complex network deployments, services have the option of deploying multiple PrinterOn services to be configured at once within the same MDM.
- **Improved – Print History Storage Management** (AND-1139)  
Android users now have the option to set the Print History Storage size to 0MB.
- **Fixed – Updated User Messaging Consistency** (AND-1111)  
Updated messaging in Android to provide more consistent messaging as compared to the iOS version.

## System Requirements

- Android 4.4 or newer
- MDM/MAM integrated applications require a configured MDM/MAM server and provisioned device to work correctly.
