

PrinterOn Enterprise 4.2.3 Supplemental Release - Release Notes

Version 4.2.3 Supplemental Release

Product Changes and Enhancements

PrinterOn Enterprise 4.2.3 Supplemental Release is a maintenance update that addresses an issue introduced in PrinterOn Enterprise 4.2.3, which occurs when integrating PrinterOn with an Azure AD v1 Auth authentication service.

This release supersedes the 4.2.3 release and should be used in all cases.

For a list of new features or resolved issues provided with the 4.2.3 Release of PrinterOn Enterprise, refer to the [PrinterOn Enterprise 4.2.3 Release Notes](#).

IMPORTANT NOTE: You can only upgrade to PrinterOn Enterprise 4.0+ from version 2.5.1 or higher. For upgrades from previous versions, please update your software to the latest version of 2.5.1.

PrinterOn STRONGLY recommends upgrading all servers to version 3.2.7 before upgrading to 4.2.3 for the best upgrade experience.

General Improvements and Resolved Issues:

The following section describes issues that have been resolved and other general product improvements.

- **Fixed – The PrinterOn Server unable to perform user lookup in Azure AD** (CSOSCPS-7090)
In PrinterOn Enterprise Version 4.2.3, some users might be unable to successfully print using the email or Google Cloud Print workflows. The issue stemmed from an error in the way users were saved from the Azure AD user store to the PrinterOn user store. This issue was limited to organizations using Microsoft v1 Auth; organizations using Microsoft v2 Auth were unaffected. The PrinterOn Enterprise 4.2.3 Supplemental Release fixes this issue.

NOTE: These release notes and previous versions may be found on the PrinterOn on website at <http://www.printeron.com/support/product-releases.html>

Installed Product Information

PrinterOn Enterprise 4.2.3 includes the following software:
