

PrintWhere 6.1.4 - Release Notes

Version 6.1.4

Product Changes and Enhancements

PrinterOn PrintWhere is a unique and powerful software solution that enables any Windows-based PC or laptop to print to any PrinterOn-enabled print device. PrintWhere eliminates tedious printer configuration and empowers users to discover and print to printers anywhere in the world using a simple and easy-to-use software solution.

PrinterOn PrintWhere 6.1.4 is a maintenance update that focuses on improvements to the upgrade process.

This release supersedes the 6.1.3 release and should be used in all cases.

IMPORTANT NOTE: You can only upgrade to PrinterOn Enterprise 4.0 from version 2.5.1 or higher. For upgrades from previous versions, please update your software to the latest version of 2.5.1.

PrinterOn STRONGLY recommends upgrading all servers to version 3.2.7 before upgrading to 4.0.1 for the best upgrade experience.

New Features and Enhancements:

- **Improved – Reboot Options for MSI Installer** (PWC-6964)
PrintWhere Desktop users are now presented with the option to reboot “Now or Later” when upgrading their PrintWhere version.
- **Improved – Improved Upgrade Process** (PWC-6964)
When upgrading PrintWhere Desktop client, the service will clean up older versions and only request a reboot once the upgrade has completed.

NOTE: These release notes and previous versions may be found on the PrinterOn on website at <http://www.printeron.com/support/product-releases.html>
