

Print Delivery Station 4.2.0 - Release Notes

Version 4.2.0

Product Changes and Enhancements

The PrinterOn Print Delivery Station allows users to turn nearly any printer into a Cloud Capable printer. The PrinterOn Print Delivery Station software connects your printers or MFPs to PrinterOn's services, including PrinterOn Hosted and the PrinterOn Enterprise Server.

The PrinterOn Print Delivery Station software is a software-based cloud print enabling solution that provides a wide range of options and flexibility to meet various deployment needs. The solution's easy installation and configuration capabilities allow you to enable printers and MFPs in minutes.

This release supersedes the 4.1.4 release and should be used in all cases.

IMPORTANT NOTE: Standalone PDS and Standalone PDG can NOT be installed on the same PC.

IMPORTANT NOTE: You can only upgrade to PrinterOn Enterprise 4.0 from version 2.5.1 or higher. For upgrades from previous versions, please update your software to the latest version of 2.5.1.

PrinterOn STRONGLY recommends upgrading all servers to version 3.2.7 before upgrading to 4.2.0 for the best upgrade experience.

Product Changes and Enhancements:

- **Improved – Updated Look and Feel for PDS Web Print** (CSS-1330)
A number of small user experience improvements to the web release experience providing better feedback to users regarding the number of jobs available to release.
- **Fixed – PDS Reporting Performance** (PDS-1571)
Addressed a number of issues related to PDS status reporting under heaving volume. Resolved an issue that caused PDS to delay sending print log activity in certain error conditions.

NOTE: These release notes and previous versions may be found on the PrinterOn on website at <http://www.printeron.com/support/product-releases.html>
