

PrinterOn Mobile for iOS 3.6.7 - Release Notes

Version 3.6.7

PrinterOn Mobile for iOS offers an integrated solution for accessing both the PrinterOn Server Platform as well as PrinterOn's global network of Public Print locations in a single unified application. PrinterOn Mobile for iOS simplifies the process of discovering and printing to all PrinterOn's services.

PrinterOn Mobile for iOS supports iOS 10.0 or newer.

Product Changes and Enhancements:

- **New – Improved security of Remote Release workflow** (CSOIOS-733)
With the release of PrinterOn Enterprise v.4.2.4, new security enhancements have been made that resulted in the deprecation of several previously used methods for the remote release of print jobs to the printer. To address these changes and avoid any impact on users, this release of the PrinterOn Mobile App for iOS removes the ability to use the deprecated remote release workflows when the app is communicating with a server running PrinterOn Enterprise v.4.2.4.

General Improvements and Resolved Issues:

The following section describes issues that have been resolved and other general improvements.

- **Fixed – Several minor UI issues** (CSOIOS-706, CSOIOS-714, CSOIOS-717, CSOIOS-724, CSOIOS-727)
This release includes several fixes of minor UI bugs, primarily UI layout issues.

System Requirements

- iOS 10.0 or newer
- MDM/MAM-integrated applications require a configured MDM/MAM server and provisioned device to work correctly.
