

**10.9%**  
increase

In 2021, 712 healthcare data breaches affecting 2.95 million patients were reported in US. That sets a record for healthcare data breaches

(HIPAA Journal Dec 2021 report)

A secure, remote printing solution can help healthcare providers save time, lower costs and offer improved patient care.

### + Lower Operating Costs

Eliminate expensive VPN connections used to print to remote locations and third-party providers such as clinics, labs or offices which are not on the same secure network as the central hospital.

### + Secure Print from EMR Systems

Doctors need to deliver care to patients whenever and wherever they may be. PrinterOn enables secure printing from EMR systems from any mobile device providing instant access to important patient information.

### + Scalability and Flexibility

PrinterOn is a highly flexible, scalable and configurable software-based system sitting in between the application and network layers of an organization's IT infrastructure. Functionality remains the same whether deployed on premise behind the firewall or in the cloud.

### + Increase Security

Meet virtually any security requirement for your organization with control of user authentication, print job data encryption, transmission encryption and a variety of secure release methods at the print device.

### + Simplify Administration

The entire print infrastructure can be managed through a single location. The PrinterOn web console provides access to all settings, printers, configurations and reports making managing and monitoring simple and efficient.

### + Superior User Experience

Remote printing can be configured to work with the same workflows a user is used to. No changes. No training. To the user, printing to a remote printer is the same as printing to a printer down the hall.

# healthcare

PrinterOn enables doctors and staff to print reliably and securely from any device whether on or off the network.

**"I need to set up a remote printing location at a lab in another city"**

Set up a print network in hours, not days. PrinterOn substantially reduces the time and resources required to provide remote printing capabilities at external locations and connects all of your networks for secure mobile print.

**"I want to be able to print from my tablet when I am at the hospital but also wherever a patient may be"**

With PrinterOn, doctors and staff can print from any mobile device, laptop or desktop to hospital printers on the network or remote printers from literally anywhere.

**"I require a print solution that complies with patient privacy laws"**

Today, PrinterOn's end-to-end security and encryption meets the demanding requirements of many banks, healthcare organizations, financial institutions and corporations worldwide.

## • Mobile Device and Printer Agnostic

Support for all printer manufacturers and mobile device types is especially beneficial in a "BYOD" environment.

## • Mobile Apps and Print Plugins

PrinterOn mobile apps for iOS and Android are unsurpassed in their ability to allow users to find and securely print to private or public printers. The Android print plugin provides native printing without using a 3rd party app for a more natural workflow.

## • Remote Printing

PrinterOn securely connects print requests submitted from a device on one network to physical printers on a completely disconnected network, even from desktop computers and home printers.

## • PrintWhere®: Windows Print System

A complete secure print rendering and submission system for Windows-based devices including desktops, laptops, and Surface tablets.

## • Pull Printing

Secure Release Anywhere™ gives users the flexibility to choose an output device at the time of print release which reduces print waste when combined with secure release.

## • Robust MDM Support

Deep integrations with industry MDM leaders such as AirWatch, Good, and MobileIron mean that you can control PrinterOn mobile app deployment as well as app behavior.
