

PrinterOn Mobile for iOS Release Notes

Version 3.1.0

Product Changes and Enhancements

PrinterOn Mobile for iOS offers an integrated solution for accessing both the PrinterOn Enterprise Platform as well as PrinterOn's global network of Public Print locations in a single unified application. PrinterOn Mobile for iOS simplifies the process of discovering and printing to all PrinterOn's services

This update of PrinterOn Mobile for iOS introduces a number of improvements to the iOS application including extended support for iOS 8.

The following are some of the enhancements and improvements that have been made in this version of PrinterOn Mobile for iOS.

- **New – Document Provider Support (iOS 8 only)**
PrinterOn Mobile for iOS now supports iOS Document Provider support. Users may now access Cloud Storage content directly from within the application, including Apple's own iCloud Drive, Dropbox and Box. By leveraging Apple's built in technology, PrinterOn Mobile for iOS is able to offer a zero-configuration solution for accessing and printing Cloud content anywhere in the world.
- **New – Touch ID Managed Release Codes (iOS 8 only)**
Secure Release Codes received for print jobs using the application are now accessible using Apple's Touch ID to provide an extra layer of protection. Affected users will be asked to provide their Touch ID prior to accessing their release code, or releasing their jobs remotely.
By using Apple's native Touch ID framework, users' information and Touch ID details are secured by the operating system and not provided to PrinterOn.
- **Updated – AirWatch App Integration**
The PrinterOn for AirWatch application has been updated to include the latest AirWatch SDK integration as well as the features described in this release.
- **Improved – iPad Interface Improvements**
A number of improvements have been introduced for the iPad interface to address the larger screen size. Changes include a more appealing printer selection process, presentation of information, printer details and control the overall workflow.
- **Improved – Danish & Korean Localizations**
A number of minor improvements have been made to both Danish and Korean localizations throughout the application.

Please contact support@printeron.com if you have any questions.
