

PrinterOn Mobile for iOS 3.5.0 Release Notes

Version 3.5.0

Product Changes and Enhancements

PrinterOn Mobile for iOS offers an integrated solution for accessing both the PrinterOn Server Platform as well as PrinterOn's global network of Public Print locations in a single unified application. PrinterOn Mobile for iOS simplifies the process of discovering and printing to all PrinterOn's services.

PrinterOn Mobile for iOS supports iOS 8 or newer.

The following are some of the enhancements that have been made in this version of PrinterOn Mobile for iOS.

Product Updates:

- **New – Support for Azure AD and App 3rd Party Identity Management**
PrinterOn-developed Apps have been enhanced to support form-based authentication services provided by 3rd party iDM providers. This new support enables users to authenticate using existing, externally hosted authentication forms. This increases overall security by integrating with OpenID Connect authentication forms.
- **New – Citrix Worx MDM/MAM Support**
PrinterOn mobile apps now support Citrix Worx MDM/MAM to provide enhanced security and control for organizations using Citrix MDM. PrinterOn Citrix MDM support delivers all features consistent with other PrinterOn MDM integrations including remote configuration using existing MDM/MAM functions such as:
 - Remote PrinterOn service info configuration
 - User control limits
 - Content access management using system extensions
- **New – Server-Side Document Preview for Mobile Apps**
PrinterOn Enterprise 4.0 supports server-side document preview capability that improves the user experience when printing from iOS mobile apps. This server-based preview can generate high quality previews of nearly any file format. Previewed documents are efficiently streamed to the mobile devices using a per-page, on-demand method to retrieve previewed pages. Options including paper sizes, color/mono, and page ranges are supported for most formats to provide high quality previews of original documents.
- **New – Color and Mono Print Output Controls**
PrinterOn administrators now have greater control to manage access to color and mono output on a per-print-queue basis. Administrators can now select whether users see color or mono print options. They can also present mono output as default for end users using PrinterOn workflows. This extends PrinterOn's existing finishing options and ability to manage:
 - Page range
 - Available form sizes and default paper size
 - Duplex output options and default behavior
 - Administrator imposed per-job page limits
 - Administrator imposed per job output file size limits

- **Updated – BlackBerry (Good) MDM/MAM Support and Libraries**
Updated PrinterOn mobile apps to the latest SDKs and MDM libraries supplied by BlackBerry (Good) to ensure the highest security. Updated to version 3.0.2+ for iOS
- **Updated – AirWatch MDM/MAM Support and Libraries**
Updated PrinterOn mobile apps to the latest SDKs and MDM libraries supplied by AirWatch to ensure the highest security. Updated to version v5.9.3.3 for iOS.
- **Updated – MobileIron MDM/MAM Support and Libraries**
Updated PrinterOn mobile apps to the latest SDKs and MDM libraries supplied by MobileIron to ensure the highest security. Updated to version v3.1.1. for iOS.
- **Improved – German Localizations**
Improved German translation for iOS throughout the mobile apps.

System Requirements

System Requirements

- iOS 8 or newer
- MDM integrated applications require a configured MDM server and provisioned device to work correctly.
