PrinterOn Mobile for Android Release Notes

Version 3.1.1

Product Changes and Enhancements

PrinterOn Mobile for Android offers an integrated solution for accessing both the PrinterOn Mobile Print Platform and PrinterOn's global network of Public Print locations in a single unified application. PrinterOn Mobile for Android simplifies the process of discovering and printing to all PrinterOn's services.

This update of PrinterOn Mobile for Android introduces a number of improvements to the Android application.

The following are some of the enhancements and improvements that have been made in this version of PrinterOn Mobile for Android.

- **New** **– Cloud Content Provider Support**
  PrinterOn Mobile for Android now supports Cloud content providers. Users may now access and print Cloud storage content directly from within the application, including Google Drive, Dropbox and Box.
  Content from other providers may still be printed by sharing files with the PrinterOn application.

- **Improved – Document Name Consistency**
  Improved overall consistency when sharing documents from other applications. Printed web pages now show their URL as the job name, image names properly show up in PrinterOn reports and documents with non-English characters are now properly displayed.

- **Improved – User Interface Workflow**
  Numerous minor workflow improvements have been added including:

  - Pressing cancel when previewing a document always returns the user main page
  - Authentication prompt is shown immediately when scanning QR codes while previewing documents
  - Job status notifications are now shown when viewing any page.
  - Addressed an issue that caused unnecessary screens to remain open when printing multiple documents.

- **Fixed – Mixed paper size and page range support**
  Addressed an issue that caused invalid page range error for letter and printing to other paper sizes such as A4.

- **Fixed – App crashing when sharing certain documents from Google Drive**
  Some files caused the PrinterOn App to crash after using the Send File option for certain documents.

Please contact support@printeron.com if you have any questions.
